D10 Series Basic Operation

- ▶ Turn on the instrument by switching your power bus on. It is OK to leave the instrument on during engine start.
- ▶ The instrument ships with factory-configured screens that can be modified by the user.
- ▶ With no menu displayed, cycle through screens in the rotation using the hotkeys: **(1)** cycles to the previous screen and **(6)** cycles to the next screen.
- ▶ Display a page's menu by pressing **(2)**, **(3)**, **(4)**, or **(5)** below that page. While a menu is displayed, buttons perform the function as labeled on-screen.

Full Screen

1/2 | 1/2 Screen

The configuration of the pages on the screen determines which buttons are used to display a page's menu.

With no menu displayed, press and hold **(6)** to display a list of all available screens, including those not in the hotkey screen rotation. From this menu, you may also configure the default screen and which screens appear in your rotation.

To access screens native to another instrument, you must have the instruments connected.
